

ABOUT US

Since 2007 we have been driven to remain a cut above the competition in investment castings and everything we do. Settling standards of excellence, acquiring many firsts, to its credit and achieving a number of milestones on its way, in reaching where we stand now. It is our goal to establish lifelong relationships with our customers that benefit us both.

MISSION

We continually improve our high-tech casting process by continuing to invest in technology, people and company processes. Our greatest asset is our group of motivated and highly qualified employees. By daring to think out of the box and by always considering whether things can be done "technically better, differently, cheaper and/or more simply", we arrive at the best solution for a competitive price.
